Very nice elongated set of Menuki 目貫.

The theme of this pair of menuki is a saihai-baton and Shikibo-baton.

They are instruments held by the generals leading their troops on the battlefield during the samurai period and used to command their troops. The lustrous gold and silver colour painting enhances the work.

In combination of different 物質 metals and 技法 techniques.

江戸時代 Edo periode. 日付 Date ca.1790-1820.

For me not possible to say by which school it was made
